Fujitsu Self-Checkout

U-SCAN Express+

Plussing the self-service experience

Fujitsu continues to lead the digital transformation of retail with the launch of U-SCAN Express+. Like its full cash recycling counterpart the U-SCAN Elite, U-SCAN Express+ is designed from the ground up for maximum flexibility for accepting cashless payments. The compact footprint and minimalist aesthetic allow retailers to add multiple units in a small space, creating high throughput self-checkout environments and thus enhancing the customer experience. Combined with industry-leading technology from HP, U-SCAN Express+ performs fast cashless transactions at lightning speed.

Key Features

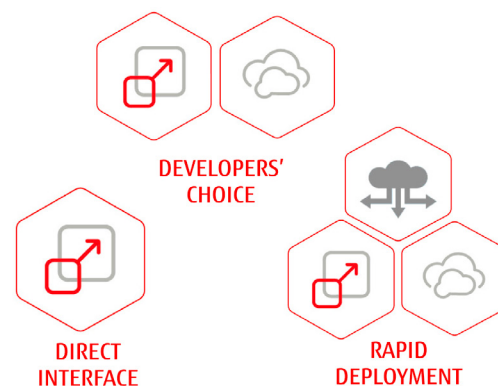

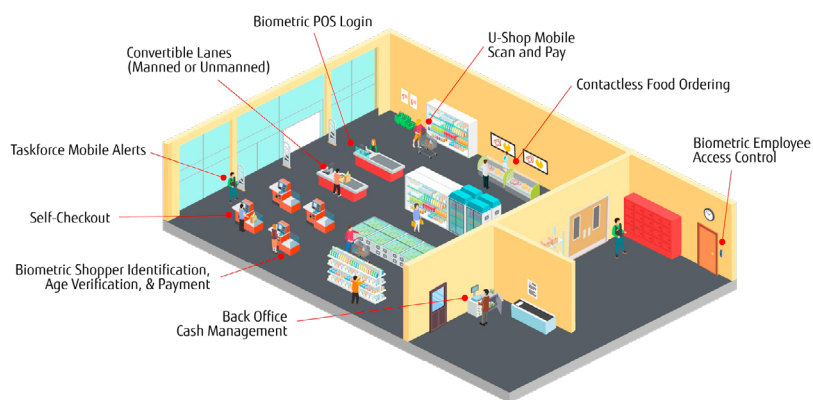

- Small footprint enables high throughput self-checkout
- Performs cashless transactions at lightning speed
- Multiple configurations available
- Leading HP technology provides maximum responsiveness
- U-SCAN software provides familiar experience for customers
- A.I. ready

U-SCAN Express+ meets the expectations of today's retail customers by providing a full self-service experience without the friction involved with learning curves. With Fujitsu, retailers can know their investment is secure and respected. As part of the S3 line of retail technology, U-SCAN Express+ was purposefully engineered to simplify upgrading and modifying the device well into the future, without sacrificing the build quality that has established Fujitsu's heritage reputation. Coupled with Fujitsu's intuitive U-SCAN software, U-SCAN Express+ provides the flexibility and reliability needed in modern retail technology.

S³ Self Service Simplified

Fujitsu S3 solutions bring unified commerce capabilities directly to the customer's in-store experience. S3 solutions ensure, no matter the touch-point, when a customer chooses self-service, their experience is always familiar, consistent and intuitive. By providing a persistent unified experience, S3 solutions ease the customers learning curve, ensuring high adoption rates while reducing the friction associated with typical disparate in-store technologies.

Unified Commerce Solutions

As part of the S3 line of self-service products, U-SCAN Express+ personifies unified commerce hardware solutions. Built with the same sleek, modern design as the U-SCAN Elite, U-SCAN Express+ allows a retailer to deploy a sophisticated, familiar look throughout the retail environment.

A common look and feel across all self-service devices ensure your customer always knows what to do. After all, your customers came to shop and pay, not struggle with technology.

S3 solutions not only reduce estate management costs, they reduce interventions to free up labor for more important revenue-generating activities.

S3 Solutions are Self-Service Simplified.

S3 Integration

Fujitsu understands the uniqueness of each retail environment our systems need to integrate into. From legacy software and outdated hardware to the most sophisticated in-house cloud-based applications, U-SCAN Express+ is prepared to work with them all. To meet that challenge, S3 Integrations offer 20 years of retail self-service solutions expertise. With three software packages to choose from, no matter the platform, system, or application, integration has never been simpler or more flexible.
