## FUJITSU Cash Automated Solution

### SmartCASH®

#### The smart way to make change

Automating cash payments has never been more important. Labor costs are rising at an accelerated pace. Emerging in-store business models require reallocating staff, further taxing already strained resources. Customers are choosing retailers who provide the self-service options they want. Manually handling cash is now a health risk that should not be ignored. Addressing all these new challenges takes more than yesterday's cash dispensers. It takes a solution small enough to be installed almost anywhere, integrate as easily with legacy systems as the latest technology, and be flexible enough to be used as a payment platform device across the retail store. It takes something smart to change the way retailers manage cash payments. Fujitsu's Global Cash Box Module, SmartCASH®, is the smart way to make change.

#### Key Features

- Smallest footprint of any full capacity recycling payment module
- Adaptable design meets any deployment needs
- Fujitsu cash and coin recycling devices – the industry's most trusted
- Best-in-class counterfeit and fitness detection/sorting
- Single USB cable interface
- Multiple configurations
- Compatible with all S3 products

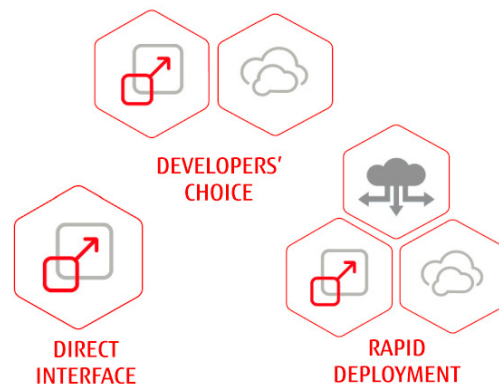

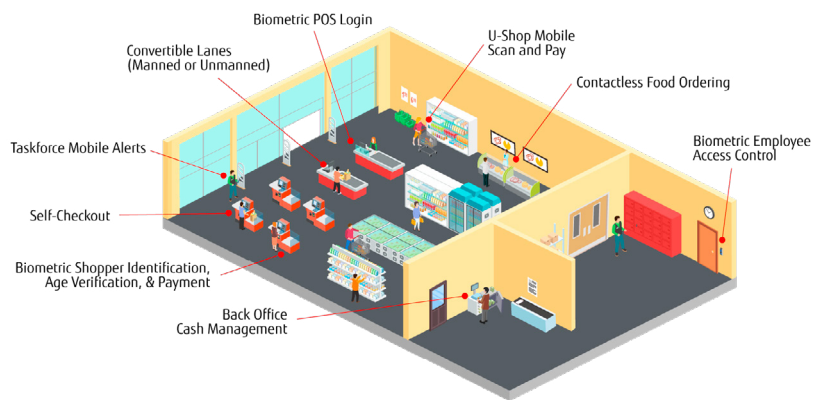

Featuring full cash and coin recycling, SmartCASH has capacity to store up to 2,240 notes and 4,200 coins. It includes the most flexible and reliable small-format bill recycling unit in the market today, the FUJITSU GSR50. SmartCASH accepts up to 50 notes in a bundle for deposit, and dispenses up to 20 notes on withdrawal to minimize float management.

With the smallest footprint in its class and a single USB cable interface, the SmartCASH is designed to be the single payment module for all retail applications:

- POS checkout counter
- Convertible lanes
- Self-checkout
- Back offices

# S<sup>3</sup> Self Service Simplified

Fujitsu S3 solutions bring unified commerce capabilities directly to the customer's in-store experience. S3 solutions ensure, no matter the touch-point, when a customer chooses self-service, their experience is always familiar, consistent and intuitive. By providing a persistent unified experience, S3 solutions ease the customers learning curve, ensuring high adoption rates while reducing the friction associated with typical disparate in-store technologies.

## Unified Commerce Solutions

As part of the S3 line of self-service products, SmartCASH personifies unified commerce hardware solutions. The minimalist design and compact size allow retailers to deploy a single common self-service platform throughout the retail environment.

A common look and feel across all self-service devices ensure your customer always knows what to do. After all, your customers came to shop and pay, not struggle with technology.

S3 solutions not only reduce estate management costs, they reduce interventions to free up labor for more important things, like revenue-generating activities.

S3 Solutions are Self-Service Simplified.

## S3 Integration

Fujitsu understands the uniqueness of each retail environment our systems need to integrate into. From legacy software and outdated hardware to the most sophisticated in-house cloud-based applications, SmartCASH is prepared to work with them all. To meet that challenge, S3 Integrations offer 20 years of retail self-service solutions expertise. With three software packages to choose from, no matter the platform, system, or application, integration has never been simpler or more flexible.

As part of the S3 line of products, SmartCASH provides for out-of-the box compatibility with all Fujitsu S3 self-service solutions.
