Fujitsu Cash Automated Solution

SmartCASH® SE

The smart way to make change

Automating cash payments has never been more important. Labor costs are rising at an accelerated pace. Emerging in-store business models require reallocating staff, further taxing already strained resources. Customers are choosing retailers who provide the self-service options they want. Manually handling cash is now a health risk that should not be ignored. Addressing all these new challenges takes more than yesterday's cash dispensers. It takes a solution small enough to be installed almost anywhere, integrate as easily with legacy systems as the latest technology, and be flexible enough to be used as a payment platform device across the retail store. It takes something smart to change the way retailers manage cash payments. Fujitsu's Global Cash Box Module, SmartCASH® SE, is the smart way to make change.

Key Features

- Smallest footprint of any full capacity recycling payment module
- Featuring bulk coin acceptance for faster automated cash handling
- Adaptable design meets any deployment needs
- Fujitsu cash and coin recycling devices – the industry's most trusted
- Best-in-class counterfeit and fitness detection/sorting
- Single USB cable interface
- Multiple configurations

Featuring full cash and coin recycling, SmartCASH SE has a large storage capacity and bulk coin input with accept speeds of five coins per second. It includes the most flexible and reliable small-format bill recycling unit in the market today, the Fujitsu GSR50, as well as Fujitsu's bulk coin acceptor. SmartCASH SE accepts up to 50 notes in a bundle for deposit, and dispenses up to 20 notes on withdrawal to minimize float management.

With the smallest footprint in its class and a single USB cable interface, the SmartCASH SE is designed to be the single payment module for all retail applications:

- POS checkout counter
- Convertible lanes
- Self-checkout
- Back offices
- Payment Stations

S³ Self Service Simplified

Fujitsu S3 is a suite of modular software and hardware solutions designed so that retailers can pick and choose building blocks to create a complete in-store solution or integrate individually into their existing estate to augment their in-store capabilities. S3 solutions ensure high adoption rates while reducing the friction associated with in-store technologies.

Unified Commerce Solutions

As part of the S3 line of self-service products, SmartCASH SE personifies unified commerce hardware solutions. The minimalist design and compact size allow retailers to deploy a single common self-service platform throughout the retail environment.

A common look and feel across all self-service devices ensure your customer always knows what to do. After all, your customers came to shop and pay, not struggle with technology.

S3 solutions not only reduce estate management costs, they reduce interventions to free up labor for more important things, like revenue-generating activities and improving the customer experience.
